

Surgery Assistance

Dedicated to Helping You and Your Family

If you need outpatient surgery, are staying in the hospital, or are recovering at home, you don't need to go through this time alone. Our team at Senior Helpers provides expert, personalised Surgery Assistance care to suit your individual needs and circumstances. We're here to support you, and can be by your side at a moment's notice.

Our Background

The goal of in-home care at Senior Helpers is to help clients remain happy and safe in their own homes. Since 2011, Senior Helpers has supported thousands of Australians with a pledge to provide professional and considerate care, tailored to each individual.

We are proud to lead the industry in programs like Senior Gems[®], our industry-first Parkinson's Care, Multiple Sclerosis Care and more. Our Support Staff are uniquely prepared and skilled to offer appropriate, caring and compatible support you can trust.

Personalised Care

From pre-hospitalisation support to post-hospitalisation and recovery care, we are able to support you and your family through the following stages.

Pre-Hospitalisation Support

We can provide transportation and accompany you to and from pre-surgery appointments and tests, as well as pass on any relevant information to your nominated family members. We can also assist and guide you through any pre-admission paperwork.

Day of Surgery Support

On the day of the procedure, we will travel with you to the hospital and accompany you through the various check-in points until the hospital staff are ready to guide you the rest of the way. Following the procedure, we will communicate with your nominated family members to let them know the results, accompany you from the hospital and help you get settled and comfortable back at home.

Post-Hospitalisation Support

Depending on your recovery needs, we can provide 24-hour care, or check in for a few hours a day. We can also accompany you to follow-up appointments as you need.
